APPLICANT : MATSUSHITA ELECTRIC IND CO LTD;

INVENTOR : FUJISHITA KAZUO;

INT.CL. : A23G 9/12

TITLE : ICE CREAM PRODUCTION
APPARATUS

ABSTRACT : PURPOSE: To save labor such as kneading by usual hand work or cleaning of vessel and spatula for kneading by carrying out kneading of material in a same cooking vessel while interlocking rotation of an agitating wing and bottom plate of kneading vessel.

CONSTITUTION: Materials such as egg and sugar are charged into a kneading vessel 17 of ice cream production apparatus equipped with an agitating wing 11' provided in such shape as to move from side face of inside of a cooking vessel 8 along the bottom, bottom plate 14 of kneading vessel providing a hole 15 for dropping kneaded material, cylindrical kneading vessel 17 engaging with the bottom plate 14 and kneading vessel wing 18 fixed in the inside of the kneading vessel and capable of carrying out kneading of materials when end face is brought into contact with the above-mentioned bottom plate 14 and the bottom plate 14 is rotated, and when operation is started, kneading is carried out by rotating the bottom plate 14 while interlocking with the rotation of the agitating wing 11' and the kneaded material is dropped from a dropping hole 15 into the cooking vessel 8 and kneading of the materials is finished.
